

## Compagnie Financière Tradition

### Q1 2020: adjusted revenue up 20.0% in constant rates to CHF 303.5m

Activity in the first quarter of 2020 took place against a backdrop of a gradual health crisis resulting from COVID-19, causing very high volatility in the financial markets, particularly during the month of March. The significant increase in business volumes and the positive impact on the Group's revenues once again demonstrate the essential nature of Compagnie Financière Tradition's core business which ensures liquidity in the financial markets across the different asset classes globally, while optimising prices for its clients. Compagnie Financière Tradition is one of the top 3 industry players operating in the world's largest market - the financial market.

Against this backdrop, Compagnie Financière Tradition activity grew in the first quarter with reported consolidated revenue of CHF 277.3m compared with CHF 240.2m in same period in 2019, up 20.5% in constant currencies. At current exchange rates, consolidated revenue presented an increase of 15.5%.

For the same period, **the Group's consolidated adjusted<sup>1)</sup> revenue was CHF 303.5m, compared with CHF 263.6m in 2019, an increase of 20.0% at constant exchange rates.** The adjusted revenue from interdealer broking business (IDB) was up 20.1% in constant currencies while the forex trading business for retail investors in Japan (Non-IDB) presented an increase of 17.9%.

Finally, although we generally observe a reduction in volatility in the financial markets compared to the previous month, it nevertheless remains high in April.

1) Proportionate consolidation method for joint ventures ("Adjusted")
